

PerCom 2027 Workshop Guidelines

PerCom 2027 features a wide range of workshops that significantly contribute to the success of the flagship conference. To ensure consistency and high quality across the large number of workshops, clear organizational guidelines have been established and refined over the years. These rules not only help maintain a strong and uniform experience for attendees, but also streamline and support the work of the Workshop Chairs. By filling out the GoogleForm provided with the acceptance message, each workshop organizer acknowledges the following guidelines. After that, “I didn’t know this” is no valid excuse :-)

- At least **two** organizers must be present in person during the workshop to ensure smooth coordination and session moderation.
- Each workshop may include up to four individuals as core organizers. Any additional contributors should be listed with specific functional roles—such as **Steering Committee member**, **Honorary Organizer**, **Web Chair**, or **Publicity Chair**—to maintain consistency and clarity across all workshops.
- All workshop organizers are expected to:
 - Actively publicize the workshop through multiple channels, including mailing lists, social media, and direct outreach.
 - Carefully build a strong, diverse Program Committee (PC), including members who are **committed to submitting** high-quality papers and **helping promote the workshop**.
 - Explicitly **ask PC members to submit papers** and involve them in recruiting quality submissions.
 - Personally reach out to potential authors and networks to drive submissions, rather than relying solely on public announcements.
 - Communicate professionally and promptly with authors, reviewers, and the PerCom organizing committee.
 - Respond without delay to any requests or instructions from the PerCom workshop chairs.
- Organizers must launch a website with the CFP and full Program Committee (PC) list by **July 10, 2026 (Anywhere on Earth time zone)**.
- The workshop CFP and website must clearly state that: *"papers without a valid full registration or that are not presented in-person will be excluded from the proceedings"*.
- The full workshop schedule (including talks and keynotes) must be posted (on the workshop website) at least two weeks before the event.
- All submissions and reviews must go through the official PerCom conference management system (HotCRP). Organizers may be asked to help set up their track or verify the setup.
- All workshop papers must adhere to the standard length limit: **6 pages**, with the option to include **1 additional page** for a maximum of **7 pages total**. This uniform policy ensures consistency across all PerCom workshops.
- All workshops must adhere to the following **timeline**:
 - Submission deadline: **November 17, 2026**
 - Notification deadline: **January 08, 2027**
 - Camera-ready deadline: **February 02, 2027**

Any deadline extension must be requested at least **one week in advance**. Please note that the **camera-ready submission deadline is final** and non-negotiable. No extensions will be granted.

- Each organizer (or their research group) may submit only one paper to their own workshop. These must be reported to the PerCom Workshop Chairs as Conflict of Interest (COI) papers and handled separately.
- Workshops with very few submissions may be canceled, and submitted papers may be reassigned to other appropriate workshops. To support planning and coordination, **organizers must notify the workshop chairs—before the review process begins—of the number of submissions received and their titles.**
- All accepted papers (excluding keynotes) must undergo a rigorous peer review process conducted through the official PerCom submission system, with a complete review trail. Organizers must maintain high quality standards by keeping average acceptance rates around **40%**, in line with IEEE guidelines. Accepting all submissions (i.e., 100% acceptance) is discouraged and requires prior approval from the workshop chairs.
- Authors of rejected main conference papers may be invited to resubmit to workshops (only if workshop organizers agree). These will include reviews and must be handled promptly.
- The workshop may be designated full-day or half-day based on the number of accepted papers. Final format will be decided by the PerCom Workshop Chairs.
- PerCom does NOT have a “workshop-only” registration fee. Each accepted paper requires full PerCom registration (no student rate). This should clearly be communicated to the authors through CFP. Organizers and participants (including possible panelists or keynote speakers) should also register. It is recommended to check previous conference pages to get an idea on the registration fees. PerCom may offer limited registration benefits to workshops with a strong number of accepted and registered papers, at the discretion of the chairs.
- Workshops may feature a keynote talk (minimum 45 minutes) or a panel discussion. However, keynote speakers must be recognized experts **external to the workshop organizing team**—organizers are not permitted to deliver the keynote in their own workshop.
- All workshop presentations—including papers, keynotes, and invited talks—must be delivered **in person** by a designated presenter, preferably one of the authors in the case of papers. Proxy or remote presentations are not allowed unless **pre-approved** by the workshop chairs, general chairs, and the steering committee **at least one week in advance.**
- Non-compliance with PerCom workshop policies may result in ineligibility to propose workshops for the next **two years.**
- Workshop organizers **may select one paper** as the **Best Paper** for each **full-day workshop**. The **presentation quality** of the paper should also be taken into account when making the selection.
- The **Best Paper Award will not be announced during the PerCom banquet.** Instead, it should be **announced at the end of the workshop, after a brief meeting of the organizers and before the workshop’s closing remarks.**
- Organizers must **inform the General Chairs (GC)** of the selected Best Paper winner. A **digital certificate** will be provided to the winner(s) after the workshop. Also, we will announce the winners on the main PerCom web page.
